

# AIR PURGER

**SUPERFREEZE**

**SAVE POWER**

**INCREASE PROFIT**

### Features:

- ⊙ **SUPERFREEZE** Air Purger is a robust system to remove air/non-condensable gases from the Ammonia refrigeration cycle.
- ⊙ It is capable of removing air from the system of capacity upto 200 Ton.
- ⊙ Can handle 2, 4, 6, 8 purge points.
- ⊙ Removing air from the system increases efficiency and reduces load on compressor resulting in power saving.
- ⊙ Can be installed anywhere in plant at ground level.
- ⊙ The unit is supplied fully assembled. Only foul gas, liquid line and suction line connections are done at site.
- ⊙ 100% indigenous. All parts are easily serviceable and readily available.

## WIDEST RANGE OF REFRIGERATION VALVES AND CONTROLS

Energy Efficient • Optimum Cooling • Compact
